

Story-

The Story is about the description and basic flow of online driver booking application.

Story Board

By the list user can select a driver and to book, the user should give driver's Id. When the driver is already booked the user can choose another driver.

The User should specify the route and no of days by that the driver charges the money.

By that there will be a message displayed that booking confirmed for the user.

The Admin will maintain all the reports in a file such as routes, starting point, end point, distance in km, successful rides and cancelled rides.
